PROFESSIONAL SUMMARY

Worked as Games Programmer and created multiple Gameplay Systems for Multiplayer Games made in Unreal Engine 5. Developed an understanding of Unreal's Gameplay Ability System and Multiplayer and Networking. Loves to solve problems. Always open to suggestions and ideas to create solutions using code.

TECHNICAL SKILLS

Languages: C++, C#, Python, GoLang

Software Experience: JetBrains Rider, Visual Studio, Unreal Engine 4 & 5, Unity, Git BASH, GitHub, Sourcetree, SVN, AWS, Nakama

Gameplay Programming: Implementations of complex Multiplayer Gameplay System logic using Blueprints and C++, and the Gameplay Ability System, ensuring efficient replication and accurate to desired design

PROFESSIONAL EXPERIENCE

AMMOBOX STUDIOS SDN BHD

SELANGOR, MALAYSIA

Games Programmer

MAY 2024– PRESENT

- Projects: Metaclash, Unannounced Horror Multiplayer Game (Lead Programmer)
- Built Multiplayer Ready Gameplay Systems using Unreal Engine 5 with Blueprints and C++
- Made Python Scripts to ease development outside of the Editor
- Setup Telemetry to track player data by utilizing a plugin and modifying it according to our needs
- Worked with Backend to handle player data/matchmaking by utilizing provided API Endpoints
- Produced code with Designers and Programmers in mind so that it's easy to use/reusable in Blueprints/C++
- Kickstarted Nakama R&D so we can create our own backend solution without relying on third party services

PSYCHOHOUND LTD

THIRSK, UK

Junior Games Programmer

SEP 2022– AUG2023

- Projects: Ruff 'N' Tumble, AUDL, Unannounced Horror Multiplayer Game
- Built Multiplayer Ready Gameplay Systems using Unreal Engine 5 with Blueprints and C++
- Built UI according to design using Unreal Motion Graphics (UMG)
- Utilized Gameplay Ability System for complex Gameplay Mechanics
- Produced efficient code where possible to ensure smooth gameplay and prevent hitches
- Worked closely with other Programmers, Artists, and Designers to ensure desired results
- Managed source control for our projects and to ensure all conflicts are resolved correctly

ADDITIONAL WORK EXPERIENCE

HOLO ADV: SAKURASINGULARITY.EXE

FREELANCE WORK

Games Programmer

APR 25 – JUNE 25

Unreal Engine 5, C++

- Adventure Story game that featured Sakura Miko and other members from Hololive
- Created Several Gameplay Systems such as Looping Hallways and "Temple Run"-like gameplay
- Setup levels for certain chapters according to Design
- Created Level Sequences for cutscenes in certain chapters

EDUCATION

TEESSIDE UNIVERSITY*BSc (Hons) Computer Games Programming (2:1)***MIDDLESBROUGH, UK**

SEP 2019 – MAY 2021

KDU PENANG COLLEGE UNIVERSITY*Diploma in Games Technology (CGPA 3.38)***PENANG, MALAYSIA**

APR 2017 – APR 2019

PROJECTS

ASTRONAUGHT*Games Programmer**Unreal Engine 5, C++***EPIC MEGAJAM 2023**

14 SEP 23 – 21 SEP 23

- Exploration Tower Defense Game with the objective of escaping the planet by fighting and gathering resources on a hostile planet
- Made Gameplay Systems such as Resource and Building spawning
- Worked in a team of 5 to create a game for the Epic MegaJam

HOBBIES & INTEREST

Gaming: Have a passion for gaming. Some of my all-time favourites are The Legend of Zelda series (especially Sprit Tracks and Phantom Hourglass), Shin Megami Tensei: Persona series and Kingdom Hearts series.

Shooter Games: Enjoy playing FPS games since young, my favourites are Team Fortress 2 and Half Life Series. I also played a lot of Rainbow Six Siege and Deadlock.

Puzzle Games: Love puzzle games like The Room series and Portal series especially the co-op

Baking & Cooking: Enjoy making food and baked goods for friends. I find the process fun and calming. I have a keen interest in baking bread (especially sourdough)
